Uşak Anatolian High School

Work History

2022 - 2022
Durmazlar Makina | Bursa, Turkey
Senior Software Developer

- Developed databases, programs and processes for integration and implementation across enterprise.
- Trained new developers and programmers on company standards for design and review.
- Monitored ongoing operation of assigned programs and responded to problems by diagnosing and correcting logic and coding errors.
- Provided technical support using knowledge of complex technology to solve problems and support new projects.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Adjusted design parameters to incorporate new features.
- Documented technical workflows and knowledge to educate newly hired employees.

2021 - 2022
Uşak Municipality | Uşak, Turkey
Mobile Application Developer

- Presented proposals to senior engineers and developers outlining enhancements designed to improve usability and increase potential ROI.
- Collaborated across multi-disciplinary teams using Agile development frameworks.
- Partnered with marketing and sales teams to incorporate app components likely to increase sales and revenue production.
- Documented design patterns for later use as templates in subsequent patches and iterative app development cycles.

Technical Profile

- PHP
- MySQL
- HTML
- CSS
- JavaScript
- jQuery
- Linux
- Flutter
- Dart
- Firebase
- Microsoft Office
- Microsoft Windows
- Adobe Photoshop
- Adobe Illustrator
- Google Ads
- Google Analytics

Competencies

- API design knowledge
- Application development
- Architecture oversight
- Code fixes
- Code validation
- Code versioning
- Cost savings
- Hardware and software installation
- Innovative
- Product development
- Project Management
- Programming
- Programming development
- Search Engine Optimization
- Software Development
- Software Development Life Cycle
- Technical Analysis
- Technical Support
- User documentation
- User requirements analysis
- Web Security

2018 - 2021
SUNRIVALS LTD | London, United Kingdom
Founder

- Conducted target market research to scope out industry competition and identify advantageous trends.
- Created and monitored promotional approaches to increase sales and profit levels.
- Created organization's mission and vision statements for use by employees.
- Developed key operational initiatives to drive and maintain substantial business growth.
- *It is a company that I set up remotely to offer business partnerships to companies under a corporate identity. I am not physically resident, it is for entrepreneurial purposes only.*
- *https://find-and-update.company-information.service.gov.uk/company/11434882*

2016 - 2019
Freelancer
Web Master

- Coded websites using HTML, CSS, JavaScript, and jQuery languages.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX, and JSON coding.
- Implemented changes and integrated requested elements to streamline business operations.
- Determined coding requirements for specialized scripts.
- Adhered to SEO best practices while designing sites.
- Provided security maintenance and patching on website interface to maintain viability after launch.
- Oversaw back-end development using PHP to maintain website integrity.
- Developed technical solutions required to accommodate specific user-facing assets
- Discussed site and app requirements with clients to produce actionable development plans.
- Troubleshot issues with websites and fixed scripting and use issues.
- Utilized SEO techniques to optimize website content, improve search engine rankings, and increase traffic.
- Configured and purchased domains for websites.

2016 - 2018
Bemar Kariyer | Uşak, Turkey
Computer Trainer

- Tested and evaluated student progress to determine effectiveness and impact of teaching methods, materials and projects.
- Trained and developed students' skills in word-processing, spreadsheet and database programs.
- Used lectures, demonstrations and discussions to instruct students individually and in small groups.
- Invigilated and graded projects, quizzes and examinations.
- Communicated with students to discuss progress and need for tutoring and extra assistance.

Language

English - B2

Turkish - Native

Certifications

Apr 2016
English Course Completion Certificate
Uşak Savant City

Additional Information

- I have created a PHP based web framework in MVC structure with OOP. I did this inspired by a training set I watched and I've always dreamed of it. While I was watching different structures and trainings that create special structures, I created my own framework based on one of them and made improvements on it. I made an indexing engine to try to add on it later, and I made a serious contribution to SEO events by automatically extracting the sitemap. The name of this site is **https://todo.how**

- I created a system that provides QR menu service to cafes and restaurants using my own web framework. It creates a QR code according to a membership code that is automatically assigned when users become members, and their menus are accessed through it. I integrated an independent language engine that I developed into this system. For example, some menu names have to remain in the original language and customers edit them from a separate panel. However, the language of the site may change according to the preferences of the users. You can see the sample menu here **https://menude.app/1674039258**

- I like mobile application development and I want to improve myself in this field. In my first application, I wrote the project-based "Genç Kuşak" application to Uşak Municipality and this is my first experience. Basically, this application is the interaction of MySQL database and CRUD operations.

- Petiskop, the second application I made to improve myself, is social media for pets. The system that I am trying to implement here is to set up an API system with the web framework I wrote and have CRUD operations done from here. I gained experience of uploading and optimizing images from the mobile side.

- It is the third application I created for my last attempt to become a trademark on the Menude. In this application, I provided more effective use of my own web framework and worked on API security. Thus, I provided superior security to CRUD database operations. On the application side, I developed location-based events and enabled users to find cafes and restaurants within 1 kilometer radius depending on their location. I also made necessary and developmental integrations with other Flutter packages.
